

Gloria S

🏠 Flat no-A404, Max Sunflower, HopeForm Circle, Whitefield, Bengaluru - 560066

✉️ gloriasemyol@gmail.com | 📞 +91 7975311256

Objective

- Committed to professional integrity and collaborative excellence, I consistently deliver high-quality results within deadlines. An effective communicator and team player, I leverage strong technical skills to maintain precise, well-organized data systems. I am a detail-oriented professional dedicated to optimizing workflows and ensuring successful, positive project outcomes.

Education

Mount Carmel College

Bachelor of Computer Applications

- 📅 2026

MVJ PU College

2nd PU (BASCs)

- 📅 2023

Sharada Vidya Mandira

10th Std (CBSE)

- 📅 2021

Key Skills

- Languages: JavaScript, Python, HTML5, XML.
- Web Development: React, Node.js, Express.
- System Architecture: Full Stack Development.
- Database: MongoDB, Mongoose, PostgreSQL.
- Tools: Linux, Git, JWT, REST APIs, Vercel/Render.
- Communication Skills: Professional & In strong command of English with a focus on professional correspondence and clear verbal articulation.

Projects

DocSign

- Developed DocSign, a full-stack web application built with React on the frontend and a Node.js and Express backend, designed to streamline secure document signing. The application leverages MongoDB and Mongoose for efficient data management, while ensuring robust security through JWT authentication and bcryptjs for password hashing. Key features include seamless file uploads managed via Multer, dynamic PDF manipulation using pdf-lib, and reliable API communication facilitated by Axios, resulting in a responsive and secure document-handling workflow deployed across Vercel and Render.

SmartERP

- SmartERP is a secure, cloud-native full-stack application built to digitize and automate inventory and ledger management for small-to-medium businesses. Engineered with a robust Next.js frontend, a Node.js/Express RESTful API, and a PostgreSQL database, the platform replaces error-prone manual records with automated transaction processing that updates stock levels and account balances in real-time. By leveraging modern CI/CD pipelines on Vercel and Render, the project demonstrates a professional approach to secure authentication, complex state management, and the resolution of critical deployment and environment-specific technical challenges.

Greenfield Insight

- Developed a Python-based web application in Visual Studio Code for plant health diagnostics and herbal medication recommendations. Designed a user-friendly interface that enables users to upload plant images for disease detection using a trained machine learning model. Integrated personalized treatment recommendations to provide accurate, eco-friendly solutions for effective plant health management.

Kithome Application

- Engineered a mobile application using Java and XML for the cataloging and delivery of modern smart home and kitchen appliances.

Interests

- Passionate about singing and dancing, fostering discipline and creative thinking.
- Dedicated to delivering polished, well-designed projects with clean and professional layouts.
- Passionate about fostering open dialogue by maintaining a calm, approachable demeanor and a gentle tone, creating a safe space for others to share concerns.

Achievements

- Certificate of participation on ICSISCDR@24, for the 2-day International Conference on Sustainable and Innovative Solutions in Cross-Disciplinary Research.
- Secured 2nd Place in Academia, a competitive program organized by the College Science Association.
- Served as a Core Team Member of the Christian Singing Association; performed as a Soprano/Alto vocal harmonizer and completed the Enrich Music Workshop.
- Actively attended high-impact technical workshops and seminars hosted by industry leaders such as Goldman Sachs and Techbyheart.

Summary

- I certify that the facts stated in this resume are true and accurate. Supporting documentation is available upon request.
